List of Journals

The periodical and serial publications listed below are those which are currently received and scanned by INSPEC for its information services. Individual articles are selected for this abstracts journal if they are of sufficient quality and fall within the subject scope. Each entry contains the abbreviated title and country, the full title, and the publisher's name and address. The abbreviated title conforms to ISO 4-1984 (E) : *Documentation - Rules for the Abbreviation of Title Words and Titles of Publications*. The abbreviations used are from the publication *International List of Serial Title Word Abbreviations, Paris; 1985*.

A separate publication, *INSPEC List of Journals and other Serial Sources*, provides a comprehensive guide to INSPEC serial coverage from 1968 onwards. In addition to listing current serials, this publication provides details of all changed or discontinued titles. The main list is sorted under full title and each entry includes the abbreviated title, CODEN, ISSN, publisher's name and address, the date of the first issue covered by INSPEC, the publication frequency and the BLDSC shelf number. Cross-reference entries are provided to assist the user in locating titles within the list. CODEN, ISSN, abbreviated title, and country of publication indexes are included. A separate list of journals 'abstracted completely' is also provided. Details of the price of this publication may be obtained from the INSPEC Marketing Department.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.)
This is a service individually tailored to the requirements and interests of the engineer or research worker. Every two weeks details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database.

TOPICS

This is an SDI service based on standard profiles. There are over 80 subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literature within their subject area.

TAPES

The INSPEC Tape Services contain all the information included in the INSPEC publications. They are updated 50 times per year. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

INSPEC Gives You the World...

We Have it All!

The INSPEC Database has it all. Our broad coverage in the major disciplines of Physics, Electrical Engineering & Electronics, Computer Science, Control Technology, and Information Technology have made us a vital research tool for any organization that does technical research. In addition, INSPEC is cost effective for universities and libraries because it provides a good resource for those in multidisciplinary fields such as Astronomy, Materials Research, Information Science, Biomedical Engineering and Medical Electronics, and Communications.

Comprehensive Indexing

INSPEC's indexing is among the most respected in the business. Our indexers are subject specialists, so we ensure knowledgeable, consistent indexing. In addition, the indexing includes not only the usual Thesaurus Term and Classification Code indexes, but also the Uncontrolled Index Terms, Treatment Codes, Chemical Substances Indexing, Numerical Data Indexing, and Astronomical Object Indexing.

Current

The INSPEC Database is updated weekly on most systems to ensure timeliness, so you can be sure that the information you are receiving is the best and most current available.

...online, on tape, on CD-ROM and Print!
